

HydraDri™

High-Performance Powdered Truckmount Extraction Detergent

- » **HydraDri** is an ultra-concentrated, heavy duty extraction detergent especially formulated to work at cleaning temperatures associated with truckmounts and heated portable extractors.
- » **HydraDri** out-performs competitive products in side by side testing and is economical to use.
- » **HydraDri** is highly concentrated, with anti-corrosive agents and low foaming properties, which makes it ideal to use in all hot water extraction units.
- » **HydraDri** is a minimum residue cleaner, which allows for a longer lasting, higher level of appearance between professional cleanings.

*If for any reason you are not thrilled with the performance of **HydraDri** return it to your distributor and we'll get you a product that does.*

Directions:

1. Always pre-test all cleaning solutions in an inconspicuous area for colorfastness prior to application.
2. Select and apply the appropriate **CleanMaster** preconditioning pre-spray solution first.
3. For truckmounts, mix 1.5 pounds of **HydraDri** into 5 gallons of warm water to make a stock solution. For warranted stain resistant carpets, set your solution flow meter from 2 to 3 gph. For heavily-soiled, neglected carpets, set your solution flow meter at 5 gph. For portable extractors, mix 1-2 ounces of **HydraDri** with 5 gallons of water in your solution tank.
4. Extract carpet thoroughly making sure to slow down in heavy soiled areas and use a dry stroke

to dry the carpet faster and return it to service quicker. For faster cleaning, reduced fatigue, and more effective soil removal, extract with the **RX-20 Rotary Extraction Tool**. In furniture dense environments use the **Evolution** cleaning wand.

5. For faster drying, especially in humid environments, consider the use of an axial, centrifugal, or downdraft air mover after cleaning.
6. Each pound of **HydraDri** cleans up to 3,500 square feet.

See the material safety data sheet at www.cleanmaster.com for safety and regulatory information.
