

RinseOut™

Rug, Fine Fabric & Textile Acid-Neutralizing Rinse/Treatment

- » **RinseOut** is a specially formulated neutralizing, detergent free acid rinse for the final step in the safe and effective cleaning of oriental rugs, natural fabric upholstery, investment textiles, and carpeting.
- » **RinseOut** is also effective at fabric and textile treatment to prevent or correct cellulosic or chemical browning, yellowing, and to stabilize dyes and colors. **RinseOut** neutralizes alkaline and detergent residues and leaves the rug, fabric or carpet with a softer feel.
- » It is safe to use on wool and other natural fabrics, as well as synthetic fibers. It can also assist in dissolving and breaking down pet urine deposits as well as road salt and ice melt tracking.
- » **RinseOut** contains corrosion inhibitors to protect your equipment. **RinseOut** is an ultra-concentrated product that will make up to 320 gallons of neutralizing rinse.

If for any reason you are not thrilled with the performance of RinseOut return it to your distributor and we'll get you a product that does.

Directions:

Note: The preferred method for cleaning oriental rugs and investment textiles is "in-plant." When cleaning rugs on location, protect stone floors, stainless steel, and other sensitive surfaces from coming in direct contact with acid treatment or rinse. Quickly wipe up any oversprays:

Fine fabric, rug, textile, and carpet neutralizing rinse:

1. Always pre-test all cleaning solutions in an inconspicuous area for colorfastness prior to application.
2. **RinseOut** is designed to be used as a neutralizing rinse following the application of a pre-spray or preconditioning solution such as **Wool Master**, **FabricMaster HD**, **FabricMaster Fine Fabric**, or **FastBreak HD**.
3. For application through a portable extractor, mix 2-4 ounces of solution with five gallons of water. For use with a truckmount, mix one quart (32 ounces) of solution with 5 gallons of water to make concentrate. Set solution flow meter at 2-3 gph.
4. For faster cleaning, reduced fatigue, and more effective soil removal, extract with the **RX-20 Rotary Extraction Tool**. In furniture dense environments use the Evolution cleaning wand.
5. For faster drying, especially in humid environments, consider the use of an axial, centrifugal, or downdraft air mover after cleaning.
6. For use as a browning, yellowing, or dye stabilization treatment:
7. For browning prevention, and post cleaning afterspray topical treatment, mix two ounces of solution with one gallon of water. Lightly mist over the carpet, rug, or fabric being cleaned.
8. For browning or yellowing correction, mix 8 ounces of solution with 1 gallon of water. Lightly mist over the carpet, rug, or fabric being cleaned.
9. For dye stabilizing when pre-testing indicates the item is susceptible to bleeding, mix 1 part solution with 4 parts water. Apply to both sides of rug prior to cleaning. Groom or brush in applied product. Wait 5 minutes. Proceed to clean with **CleanMaster WoolMaster** or **FabricMaster Fine Fabric** according to directions. Fine Fabric & Textile Acid-Neutralizing Rinse/Treatment.
